

SUSHANT DESHPANDE

Contact #: 647-564-6166 | **E-mail:** srdyyyc@gmail.com | **Location:** Toronto, ON, L6X 0S9

Profile Page: <https://sushant822.github.io/> | **GitHub:** <https://github.com/sushant822>

LinkedIn: <https://www.linkedin.com/in/sushant-deshpande-09b965139/>

Tableau: <https://public.tableau.com/profile/sushant6978#!/?newProfile=&activeTab=0>

Profile:

Data Scientist with a background in Mathematics and Computer Science. Graduated from University of Toronto's Data Analytics Bootcamp and Master of Science in Mathematics and Computer Science from University of Lethbridge. Experienced in building statistical, predictive, and machine learning models to solve critical problems. Working knowledge of big data, AWS and PySpark. Team-oriented individual with strengths in interpersonal and communication skills and collaborating across diverse groups.

Technical Skills:

Languages: Python, R, SQL, JavaScript, VBA

Data Visualization: Tableau, D3.js, Plot.ly, Leaflet.js, Matplotlib, Seaborn

SQL: PostgreSQL, MongoDB, Microsoft SQL Server

Python: PySpark, Pandas, NumPY, SciPy, TensorFlow, Keras, SQLAlchemy, Visual Studio Code

Excel: VBA, Macros, Pivot Tables/Charts, Index/Match VLOOKUP

Other: Jupyter Notebook, Amazon Web Services (AWS), Hadoop, PySpark, Heroku, Google Colab, Bootstrap

Projects:

Predicting Real Estate | <https://findhouseprice.herokuapp.com>

Summary: Used Machine Learning (using TensorFlow and NLP) to create an app with more than 76% accuracy that can predict the price of a property based on its features and successfully deployed it to an interactive website thereby helping users to get an estimate of their property by asking minimalistic details from them.

- **Responsibilities:** Created algorithms that scraped Remax and Walk Score websites and collected data. Performed cleanup on this data and analyzed it. Build a Flask app and framed APIs to pass data stored in SQL Database to the Flask app as JSON. Generated visualizations for it using JavaScript, D3 and Leaflet. Constructed a machine model using Natural Language Processing and TensorFlow with more than 76% accuracy and deployed it successfully to website. Constantly working on tuning the model to improve its accuracy.
- **Number of team members:** Four

JavaScript Project | https://github.com/sushant822/javascript_project

Summary: Created a Flask app that will read data stored in SQL Database and pass it as a JSON file to the frontend. Build various visualizations using JavaScript, D3 and Leaflet.

- **Responsibilities:** Created algorithms that scraped Remax and Walk Score websites and collected data. Performed cleanup on this data and stored it in SQL Database. Created a Flask app and build APIs to pass data stored in SQL Database to the Flask app as JSON. Generated visualizations for it using JavaScript, D3 and Leaflet.
- **Number of team members:** Four

ETL Project | https://github.com/sushant822/etl_project

Summary: Web scraped Remax and Walk Score websites for house listings and walk, bike and transit score respectively. Cleaned the data, stored it SQL Databases and wrote queries and procedures to transform and load the data to frontend.

- **Responsibilities:** Created algorithms that scraped Remax website, collected data and performed data cleanup. Wrote SQL queries and procedures to transform and load the data.
- **Number of team members:** Four

COVID-19 Research | <https://github.com/sushant822/COVID-19>

Summary: This project sets out to answer 4 main questions: who was affected by the virus, which regions in Ontario were affected most, how was the virus contracted, and does weather conditions play a role in the spread of this virus in Toronto?

- **Responsibilities:** Analyzed the data and created powerful visualizations in Python using various libraries for it thereby making the data tell a visual story.
- **Number of team members:** Three

Professional Experience:

Data Visualizer, Weigl Educational Publishers Ltd. – Canada

May 2016 – Present

Key achievements:

- Attained 90% on yearly review and completed all projects within the set deadlines.
- Achieved 20% better results by providing actionable insights through data analysis and visualization.
- Supervised a team of intern students every summer.

Responsibilities:

- Collected data from different sources, analyzed it and created powerful visualizations and infographics.
- Analyzed structured and unstructured data to identify problems and organize findings to translate into actionable insights using innovative techniques.
- Visualized sales and production data in Tableau, generated reports, created dashboards using JavaScript, Leaflet and D3 and made presentations to be delivered to sales and management teams.
- Trained summer intern students, outlined work plans, determined resources and wrote timelines for them.

Web Designer, AXON Data – India

May 2013 – April 2016

Key achievements:

- Handled web design of 75% of client projects.
- Increased customer retention by 18%.

Responsibilities:

- Designed website layout/user interface by using standard HTML/CSS/Bootstrap practices.
- Integrated data from various back-end services and SQL Database.
- Created custom graphics for clients with more than 90% client satisfaction score.

Web Developer, Weigl Educational Publishers Ltd. – Canada

July 2010 – April 2013

Key achievements:

- Launched a new product (Digital Media Enhanced Books) within the set deadline.
- Achieved 25% increase in sales by designing and developing digital media for printed books.

Responsibilities:

- Designed and developed websites using CSS, HTML5, WordPress and Magento.
- Designed and developed Flash activities, Flipbooks, ReadAlongs and audiobooks using ActionScript 3 and HTML5.
- Developed and maintained SQL Database with inventory of books.

Education:

Data Analytics Certification, Canada

University of Toronto

Master of Science (M.Sc.), Canada

Master of Science in Mathematics and Computer Science (Linear Algebra and Combinatory Logic); University of Lethbridge

Bachelor of Engineering(B.E.), India

Bachelor of Engineering in Computer Science; Rajiv Gandhi Technical University

Awards:

- Awarded with University of Lethbridge Scholarship for getting A grade in Lambda Calculus course.
- Awarded with University of Lethbridge International Research Award for performing outstanding research in the field of Lambda Calculus and Combinatory Logic.
- Consistently recognized by supervisor for demonstrating excellent teamwork and strategic thinking skills.
- Graduated Data Analytics from the University of Toronto with an A+ grade.

Publications:

- A new program in combinatory logic equivalent to $\lambda\beta$ -reduction.
- Contributed significantly in chapters 'The undecidability theorem' and 'Correspondence between λ and CL' of Lambda-Calculus and Combinators: An Introduction.
